Compliance 360 Announces the Next Generation of Regulatory Management

Atlanta, GA. – July 9, 2008– Compliance 360, a leading provider of enterprise governance, risk and compliance (GRC) solutions, enhances its flagship product with the next generation of regulatory management for the corporate environment.

For companies who operate in highly regulated industries, this new release provides significant benefits in the management of laws, regulations, standards and guidelines. Compliance 360 customers are now able to automatically acquire content from authorized third parties or from Compliance 360-Certified Content Providers like LexisNexis®, a global information solutions provider, and stream access to the regulatory content to the appropriate person or team based on the type of law or regulation. Customers are ensured that the right people are always reviewing the right content, and take the appropriate action with respect to that content, which enhances accountability and improves efficiencies.

Additional features of the Compliance 360 Regulatory Management Module include:

- Graphical views of the status of new regulations ensure that management is aware of the legal and regulatory impact of new laws or regulations and has taken appropriate action.
- Compliance 360's Virtual Evidence RoomSM ensures all content is electronically organized and archived in a central repository. The Virtual Evidence RoomSM simplifies audits, ensures compliance, and protects the corporation in the event of a future legal or regulatory action.
- Taxonomy Management provides a single view of various laws, regulations, etc. that have common attributes. For example, a user can search and display all regulations that have a relationship with data privacy.

“Organizations around the world depend on LexisNexis for information and solutions that they can trust, be it legal, regulatory or risk management related,” said Renee Citera, vice president and managing director of research, LexisNexis. “As a premier information provider with more than 30 years of proven expertise, we understand the serious need for organizations to be in compliance. We are pleased to work with Compliance 360 to help customers face the challenge of managing in an environment of increased regulation.”

"Centene's health plans are heavily regulated at the state and federal level. This new release will help us to further streamline and automate many processes we use to manage our compliance activities. We rely on Compliance 360 to maintain its leadership in Governance, Risk and Compliance technology so we can better manage these areas in our complex, regulated world" said Robert Miromonti, vice president, ethics & compliance, Centene Corporation.

"Our Regulatory Management solution has been carefully designed and is based on hundreds of customer interviews with corporate legal officers and compliance professionals across various industries," according to Steve McGraw, Compliance 360 President and CEO. "Our clients need solutions that are business-driven and these enhancements are helping our customers improve and further streamline their management of complex legal and regulatory risks across their organizations."
